

SITUATION

- Heavy monsoon rains have caused landslides and floods across northern **India**, southern **Nepal** and **Bangladesh**.
- **A third of Bangladesh is under water**. The situation is expected to worsen, as swollen rivers carry the flood water from upstream India into the low-lying and densely populated Brahmaputra delta.
- **More heavy rain** for the region in the coming days is forecasted.
- With **many areas still not accessible**, the number of people affected is likely to rise further.
- The most pressing **humanitarian needs** are **shelter (including NFIs)**, **food and WASH**, along with **search and rescue** and **emergency health services**.
