COSTA RICA – Severe weather

- Heavy rainfall affected central and eastern Costa Rica over the last week, causing damage and forcing evacuations in the provinces of Limón, Heredia, Cartago and Alajuela.
- As of 28 June, the National Commission for Emergencies reports 19 isolated communities, 12 of which in Sarapiquí canton, and a total of 745 people hosted in shelters in Sarapiquí, Turrialba, Matina and Talamanca. Over 1 500 houses have been flooded in total, while educational and transportation infrastructure has been damaged as well.
- Over the next 24 h, heavy rainfall may still affect central and eastern Costa Rica.
